MAX-R LUMBER™
Manufactured From Pure
Recycled Plastic Milk Jugs

About Us

WE BELIEVE YOU DESERVE BETTER

We believe in creating a better product, through a better process, that leads to a better future. Max-R site furnishings are made from 95% pure recycled HDPE. 60% of our raw materials are sourced from within a 200 mile radius of our facility in Sussex, WI where we utilize a lean manufacturing process. By purchasing Max-R site furnishings not only are you investing in a sustainable product, you are investing in a sustainable future.

Invest Once

Over 25 years ago we set out on a mission to create products that would maintain their integrity and aesthetics through the harshest conditions. It all started with our unique material, Max-R Lumber™—the purest grade of recycled plastic in the industry. The material's strength and longevity results in industry leading, long-lasting sustainable site furnishings.

Built to Order

Our shelves aren't stocked with products waiting to ship the moment your order is placed. Our bins are built to order, by hand, with commercial grade building techniques. We employ pocket-screw, post and panel dado joinery and utilize a lean manufacturing process to ensure the products you receive will outlast all others in the marketplace.

Durability

To prevent fading from sun exposure, premium grade resins and UV inhibitors are added to the material in the extrusion process. The smooth surface means it won't absorb moisture, prohibits the growth of mold, is resistant to rot, and won't harbor insects. The best alternative to wood is Max-R Lumber™.

Warranty

3 YEAR WARRANTY ON SITE FURNISHINGS

Some restrictions may apply, visit www.max-r.com/terms-and-conditions for more details.

7 YEAR WARRANTY ON FURNITURE

Some restrictions may apply, visit www.sisterbayfurniture.com/policies/ for more details.

Max-R Lumber™

The creation of Max-R Lumber™ is a simple four step process. The purity of the material allows it to be recycled again and again - extending the product lifecycle, keeping the end in mind.

1. HDPE [#2] RECYCLABLES

Recyclables are collected; reclaimers sort, crush, and bale plastics.

2. CRUSHED & GROUND FLAKES

Recycled plastic is ground into flakes and cleaned of any residue or contaminants.

3. MELTED PELLETS

Manufacturers buy flakes that are melted into pellets; colorant, UV inhibitors and bonding agents are added.

4. EXTRUDED MATERIAL

Max-R Lumber™ is extruded to shape and then constructed into customized furnishings.

Recycled Plastic Makes Perfect

At Sister Bay, there's no simpler way to say it: recycled plastic is just better. We pride ourselves on producing a product that doesn't harm the environment, is beautiful in design, and can hold up in all weather conditions. Learn more about the material that launched our company in 1997 and why other materials pale in comparison.

INVEST ONCE

EARTH-FRIENDLY

RECYCLED

Quality You Can See

Products such as our Milano Loveseat reveal a lot about our emphasis for product design to exceed basic "form and function." Adhering to deliberate design-thinking makes our products better, stronger, and safer using innovative methods you likely won't be able to notice – but they are there.
